North Star BlueScope Steel Water Festival

Introduction

- NSBSL holds water celebration day on biannual basis
- Community outreach and a way to give back to the community
- Educate students on the importance of water and water related topics

During this event students rotate between different station activities.

Methodology: Planning

- Committee meeting to determine how many activities needed, type of activities, and budget
- Reached out to past community volunteers
- Reached out to personal contacts about volunteering opportunity
- Facilitated the planning of age-appropriate activities for each station
- Assisted in ordering materials and t-shirts for the event

Methodology: Executing

- Each volunteer had a station or a job and made sure everyone knew where they were going
- Students rotated between stations
- I led activity on the importance of clean water and water filtration

Conclusion

- Overall, the event went very smoothly
- Students learned about several water related topics
- I learned about teamwork and delegating responsibilities
