THE GLOBE PROGRAM

Join the GLOBE International STEM Network (GISN)!

GISN is an international network of STEM (science, technology, engineering and mathematics) professionals who contribute meaningfully to GLOBE students around the world involved in scientific field investigations and research projects.

Our vision is to be "a global community of STEM professionals cultivating local research that contributes to a global understanding of Earth system science for students, teachers, and other STEM professionals."

Our mission is to "enhance environmental literacy by promoting the use and collection of GLOBE data in support of student and GISN member research, supporting and mentoring students and other GISN members in their Earth science investigations, and collaborating with teachers and STEM professionals around the world."

How can you get involved with GISN?

It's up to you! Each relationship between a GISN member and a GLOBE school, student, educator or other GISN member is uniquely determined between the STEM professional and the educators.

Join monthly GISN Social Hours

Mentor a GLOBE student or fellow GISN member

Participate in a GLOBE Campaign or Intensive Observation Period (IOP)

Use GLOBE data in your research

Who can join?

To qualify for membership in GISN, you must:

1) hold a B.S. degree and have at least three years experience in a STEM field related to Earth or environmental sciences; or

2) be pursuing a Ph.D. in a program focused on Earth or environmental sciences; or

3) hold M.S. or Ph.D. in a STEM field and currently work in Earth or environmental sciences.
