20 years of GLOBE

In the GLOBE at My School Calendar we are proud to present winning pictures of Europe and Eurasia GLOBE at My School Picture Competition. Students from 8 European countries captured their best moments with GLOBE showing GLOBE study sites and local environment. Enjoy an inspiring GLOBE year 2015 together with them!

About GLOBE

The Global Learning and Observations to Benefit the Environment (GLOBE) program is a worldwide hands-on, primary and secondary school-based science and education program. GLOBE's vision promotes and supports students, teachers and scientists to collaborate on inquiry-based investigations of the environment and the Earth system.

Since GLOBE beginning on Earth Day, 1995, 112 countries have participated. There are more than 66,000 GLOBE-trained teachers representing almost 28,000 schools around the world. In addition, over 10 million students have participated in GLOBE -- contributing more than 120 million measurements to the GLOBE database for use in their inquiry-based science projects.
