

The ENSO Student Research Campaign

How to find a teacher(s) to
collaborate with using
GLOBE tools

Implemented by:  UCAR

What is the GLOBE Collaboration Tool?

- The GLOBE collaboration tool is the means to effective communication with fellow GLOBE teachers that share in investigative areas and protocols.
- Utilizing the GLOBE network allows students to work in a group setting, share data, research interest, and learn about regional differences.
- Collaboration also provides the added benefit of working with students from other countries, ethnicities, language, and culture.

Community

GLOBE brings together students, teachers, scientists and community members to collaborate on inquiry-based investigations of the environment and the Earth system, and to better understand, sustain, and improve Earth's environment at local, regional, and global scales.

Internationally, GLOBE is implemented through bilateral agreements between the U.S. government and governments of partner nations. Since 1995, over 110 countries have participated in The GLOBE Program.

Find a Project Collaborator

Use this tool to find GLOBE community members who are interested in collaborating on GLOBE projects, protocols or other activities.

On the search results page, you can select a person's name or organization to learn more about them. If you'd like to collaborate, select 'Request Friend' next to the person's name. This will send an email to the member asking if they'd like to collaborate. If they approve your request, you will receive an email confirming they have accepted your invitation. As friends, you'll see an email link on their My Page and will have access to their message board (or Wall). If you have additional questions, please contact our [help desk](#).
