## Things about this research!

### 1 Zarqa/Jordan rainfall

this research focused on the rainfall trends in Zarqa/Jordan. Why Zarqa? because Zarqa faces a lot of environmental challenges and one of them is drought.

### 4 Analyzing the data

The data i found was analyzed in a chart using software tools like Excel. sometimes i didn't find data so I used AI to fill the gaps.

### Methodology

this research used a methodology that helped analyzing the data suvh as: data collection, data selection data analyzing and trend analyzing and more!

### 5 the affects of the lack of rainfall

In this research i focused on the effects of the lack of rainfall and came up with creative solutions to solve such an important case like this one.

### 3 The data and its sources

This research collected data about the rainfall trends in Zara Jordan from different places such as:Department of Statistics in Jordan (mainly), which provides comprehensive records on meteorological conditions, including rainfall data, for cities and regions across the country!

### 6 Places like Zarqa

to make sure that the idea of this research is now more easy to understand i compared between Zarqa and Riyadh in Saudi Arabia which has the same problem as Zarqa by using data from GLOBE visualization system
