

THE GLOBE PROGRAM

Welcome to the GLOBE International STEM Network (GISN) Newsletter! The GISN is a network of professionals with backgrounds in science, technology, engineering, mathematics and more, who promote Earth science education around the world. The goal of this quarterly newsletter is to share news, research highlights, and upcoming GLOBE events that pertain to GISN members.

Current GISN News and Updates

The GLOBE Implementation Office (GIO) was pleased to host three GISN “Social Hours” over the last quarter. These fun, collaborative events were successful, with community participation from all six GLOBE regions!

Join the upcoming GISN Social Hour events, which will take place on:

- 26 January, at 09:00 a.m. MST
- 23 February, at 09:00 a.m. MST (GLOBE teachers are invited)
- 23 March, at 09:00 a.m. MST

[Register here!](#)

Additional Updates

GIO is working on a new GISN application process. The process aims to improve GIO’s ability to determine the interest – and collaboration and community “needs” – of potential GISN members, especially in relation to enduring connections with GLOBE partners. The new two-step application process will be launched in the early 2023!

Ways to Participate

Remember, there are several **“Ways to Participate”** as a GISN member!! Here are a few to consider:

- work with a GLOBE student or teacher;
 - conduct GLOBE research or collect GLOBE data;
 - participate in a GLOBE campaign or data challenge; or,
 - be a judge for the International Virtual Science Symposium (IVSS) or a local symposia.
-

2023 IVSS Judges Needed!!

GIO is looking for judges for the 2023 IVSS.

The 2023 IVSS theme is: *Global Connections: Investigating the Earth as a System Together*. Students are encouraged to explore the GLOBE Protocol Bundles. [Learn more here!](#)

If you are interested in being a judge, visit the [2023 IVSS Judge page](#) for more details and to sign up! Student projects will also be accepted in Thai for 2023. (If you speak Thai, GIO strongly encourages you to sign up.)

If you have any questions regarding the 2023 IVSS, please reach out to Madeline Lane at mlane@ucar.edu

Recent GLOBE Publications and GISN Highlights

Alberola-Borràs, J. A. (2022). **Introducció de l'alumnat de 4t d'ESO als projectes de Ciència Ciutadana mitjançant la mesura diària de la Pressió Atmosfèrica.**

Jennifer, B., Lyn, W., & Kristin, W. (2022). **Collaboration: Water, A GLOBE Program Intensive Observation Period and Worldwide Cooperative Project.** *Authorea Preprints.*

GISN Member - **Frank Soboczinski** (EE) featured on NASA's website:
Lydon, R. (2022, September 15). **NASA techleap prize winner tests Quantum Earth Observation System.** NASA.

What do you think of the GISN Newsletter? Have suggestions?
