

## **Sand, Silt, and Clay** (tune of *Three Blind Mice*)

By Lynne Hehr

Sand, silt, and clay.

Sand, silt, and clay.

Make up Earth's soils.

Make up Earth's soils.

Sand is gritty and feels real rough.

Silt feels smooth and is smaller than sand.

Clay is the smallest and sticks to your skin.

All work together to make up Earth's soils.

Hooray for sand, silt, and clay!
