Selecciona **Sing in** y se abre la siguiente pantalla

The screenshot shows the GLOBE Program website. At the top, there is a navigation bar with the GLOBE logo, the text "THE GLOBE PROGRAM", and "A Worldwide Science and Education Program". Below this is a featured article titled "GLOBE Welcomes Brazil as Newest Partnering Country" with a photo of two men signing an agreement. A navigation menu below the article includes "About", "Join", "Get Trained", "Do GLOBE", "GLOBE Data", "Community", "News & Events", and "Support".

The sign-in form is located below the navigation menu and includes the following fields and elements:

- Email Address:
- Password:
- Remember Me
-
- [Join GLOBE](#) [Forgot Password](#)

At the bottom of the page, there is a footer with logos for NASA and NSI, social media icons, and contact information: "NASA Official: Ming-Ying Wei", "GLOBE Implementation Office Director: Tony Murphy", and "Site Curator: Nargess Memarsadeghi".

Data Entry

Important Information:

Liquid-filled Maximum/Minimum Thermometers — GLOBE no longer recommends this type of thermometer for recording maximum and minimum air temperatures. It has been determined that this type of thermometer that uses a magnet to reset the floats becomes demagnetized and/or the floats stick within the tube, especially during fast temperature changes. GLOBE encourages you to use a digital maximum/minimum thermometer for maximum and minimum air temperature measurements. If you are currently using a u-tube thermometer please consider replacing it with a digital model.

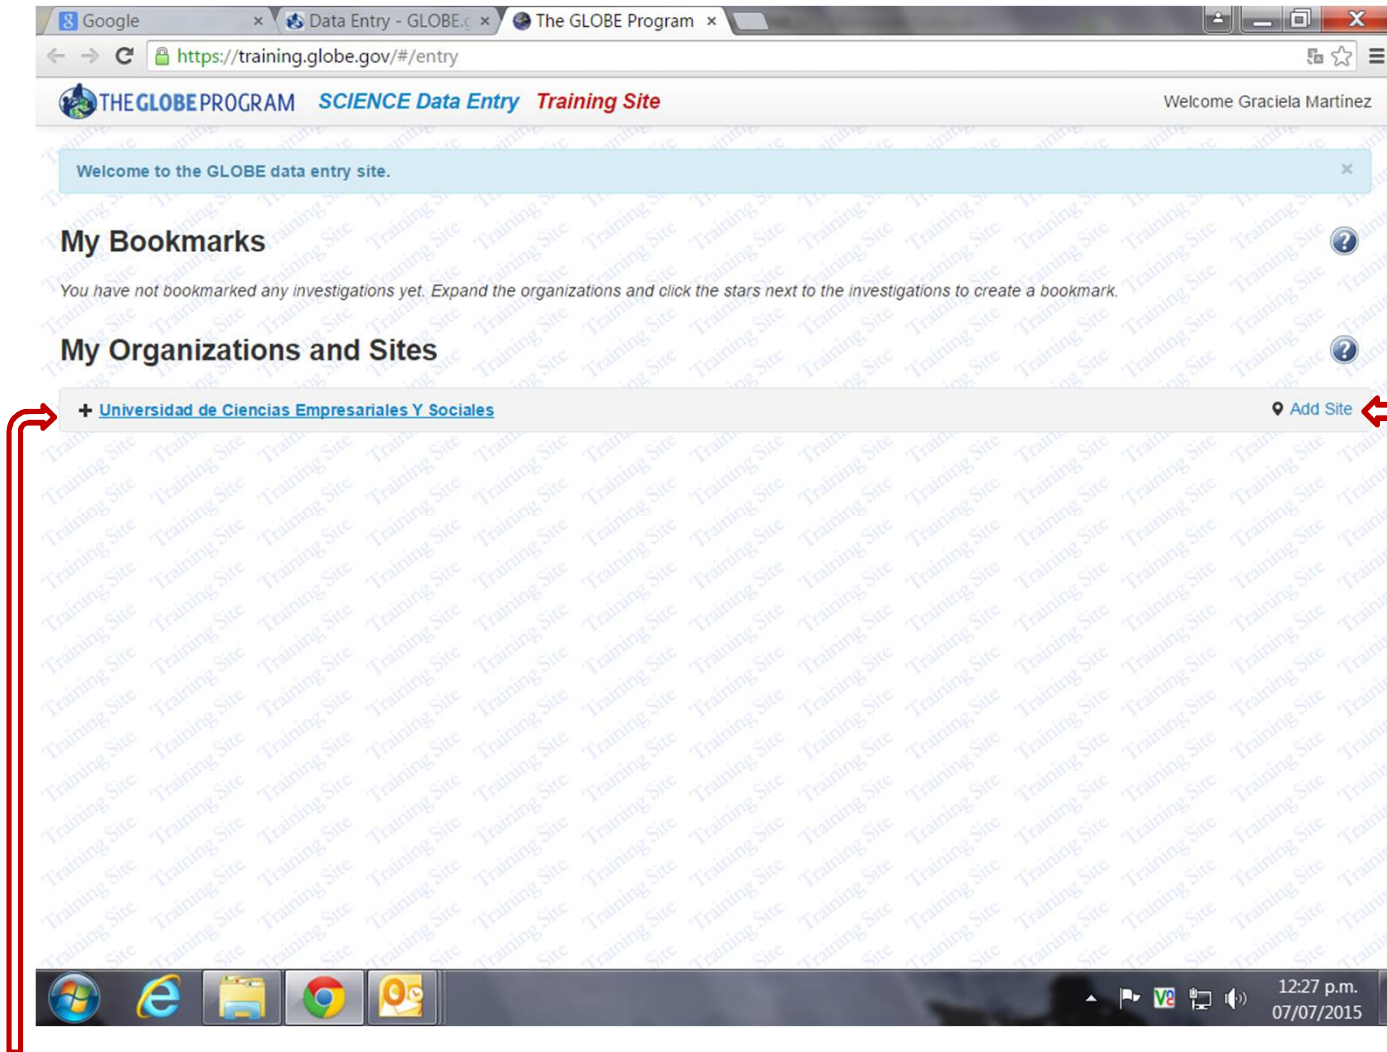

GLOBE Data Entry consists of several options:

 [Live Data Entry](#) - These pages are for entering environmental data - collected at defined sites, according to protocol, and using approved instrumentation - for entry into the official GLOBE science database.

 [Training Data Entry](#) - These pages are for practicing data entry, either during workshops or when providing others a view of the data entry process. These data entry pages are based on the newer designed data entry pages. These data are not intended for entry into the official GLOBE science database.
