# About the isee Player Tutorial

The isee Player Tutorial is an interactive model that was created with STELLA software. The tutorial will help you become familiar with the features of the isee Player software by exploring and experimenting with a Paperclip Factory Simulation.

To open the isee Player Tutorial, please do the following:

## For Windows:

1. From the Start menu, go the isee Player program group.

2. In the Tutorials folder, double-click on the file named "**isee_Player_tutorial.STM**".

OR

1. Double-click on the 🅿 icon on your desktop to start the isee Player.

2. From the File menu, choose **Open**

3. Navigate to the Tutorials folder in the directory where the isee Player is installed and double-click on the file named "**isee_Player_tutorial.STM**".

## For Mac:

1. Open the Finder and click on the **Applications** folder.

2. In the isee Player folder, double-click on **isee Player(.app)** to open the isee Player.

3. From the File menu, choose **Open**

4. Navigate to the Tutorials folder in the isee Player application folder and double-click on the file named "**isee_Player_tutorial.STM**".
