

Global Warming

Nathaniel Hall, Tasha Leggett, Leslie Wise

Mrs. Clark

John Marshall High School

April 30, 2013

This took place at John Marshall high school, with the Environmental Science teacher Mrs. Clark. Tasha, Leslie, and Nathaniel took a video showing what they do to collect data, what equipment they use, and how it is affecting the Earth. They used a data collection sheet, a GPS, and a IRT. With all of this they collect data for the www.globe.gov website that is worldwide. They found that the temperatures are actually lower than normal.
