

### ( Problem or Goal )

Increased soil  
pollution by waste  
.and factory water

### ( Future Research )

- Identification of suitable places for placing and recycling waste rather than incineration
- Reduce the use of harmful and radioactive substances
- Reduce the use of private vehicles
- Setting up a special discharge for the contaminated plant water.

## ( Project Title )

Environmental pollution and how to deal with it

### ( Procedures )

To view the soil in which the waste is deposited and compare it with arable soils as well as the soil that .is exposed to polluted water from the factories

## Pictures

### ( Problem or Goal )

Environmental pollution is one  
of the most serious life-  
.threatening problems on Earth

### ( Hypothesis )

Changes to the  
environment from  
contaminated water and  
waste.

### ( Variables )

Lack of agricultural  
production
