We Are Looking For Inspiration

The GSN is looking for ideas to help members get the most out of the network. One way we are approaching this task is to create a vision and mission statement for the GSN. But first, we would like to hear from you! Please fill out this form with your ideas, thoughts, and priorities, and what you would like from the GSN. Responses will be anonymous.

Please provide feedback by 01 October 2020.

Feedback Form

The 2020 Virtual Meeting was a great success! We had 429 attendees from 72 countries join us for the four-day event that was completely virtual. Weren't able to make it to the live sessions? You can watch all of the session recordings, including the spectacular Student Showcase at https://www.globe.gov/news-events/meetings_symposia/annual-meetings/2020-globe-virtual-meeting.

IVSS 2021

It is time to start thinking about the 2021 International Virtual Science Symposium (IVSS)! This year, we are
focusing on data science and encouraging students to expand on their data science skills. Students can use old and/or new data for their projects this year. GISN members are encouraged to mentor students and volunteer to score projects in the spring.

In order to encourage data analytic skills, we will be hosting several webinars. Please come join us at our upcoming IVSS webinars and tell others who may be interested:

**IVSS Informational Webinar** on 07 October at 9:00 am MT ([link to join](#))
**Data Science Intro and Q&A** on 14 October at 9:00 am MT ([link to join](#))
**Mapping your GLOBE data with ESRI ArcGIS** on 28 October at 9:00 am MT ([link to join](#))

In addition, we have updated the IVSS scoring rubrics this year. See the updated rubrics and all things IVSS at the link below.
