What is El Niño?

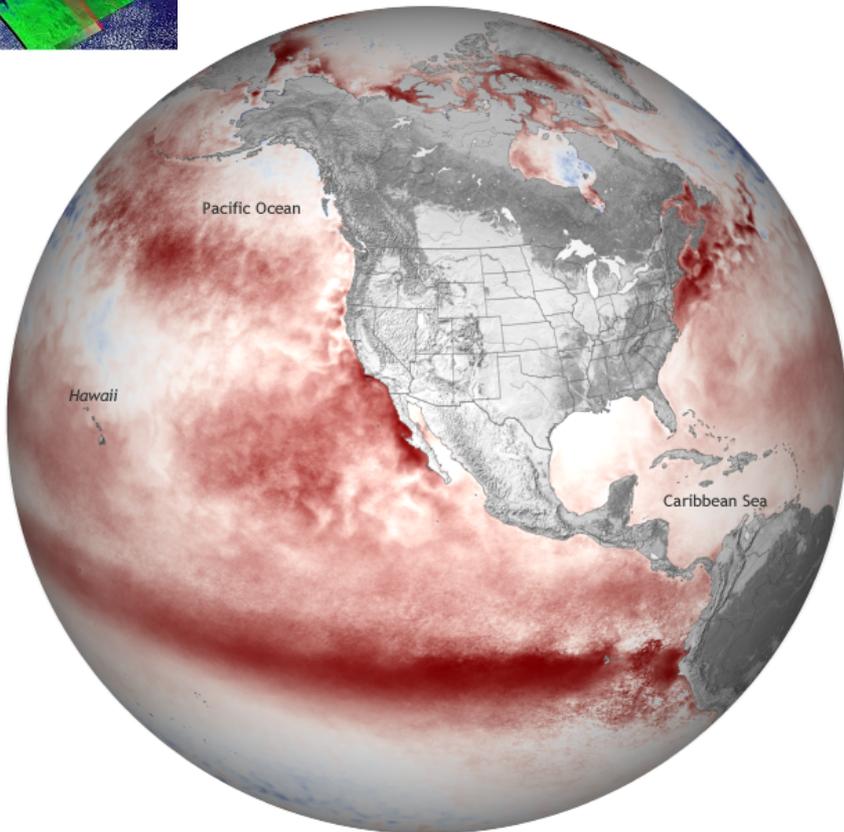

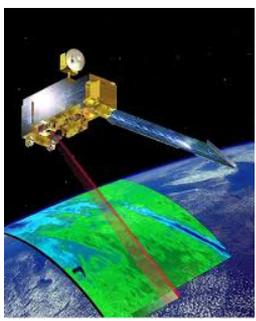

Strong Trade Winds
Warm water Piles Up off Asia
Cooler water off Americas

Weakening Trade Winds
Warm water off Asia
Moves toward Americas

How can we monitor El Niño?

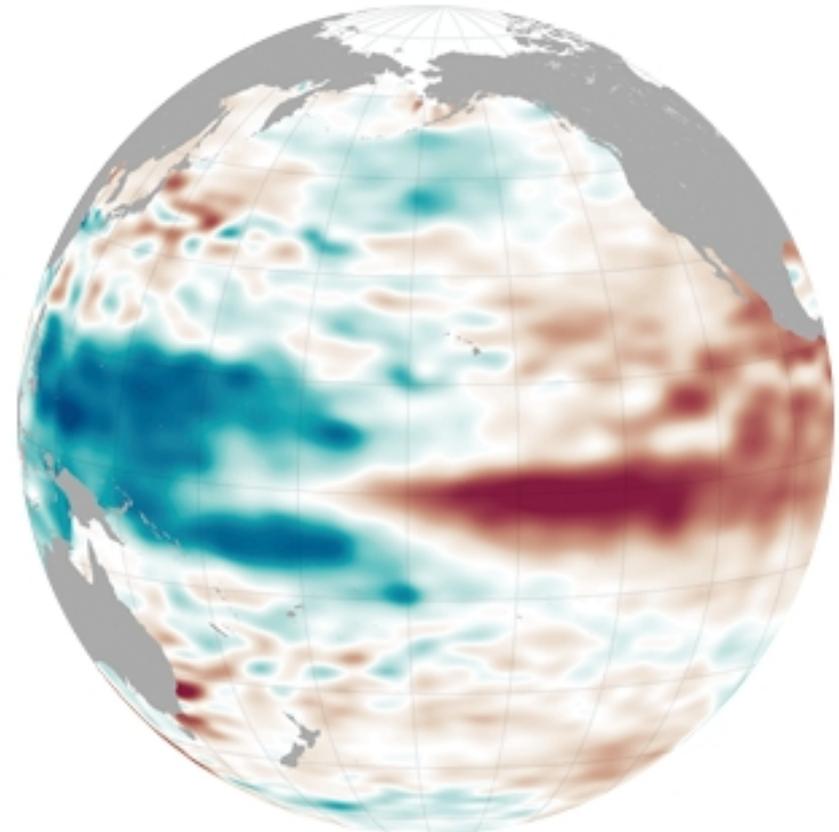

Satellite-derived SST or SSH

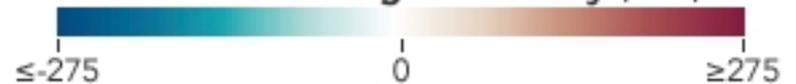

Difference from average ($^{\circ}\text{F}$)

NOAA GOES; NASA MODIS Aqua.

Sea Surface Height Anomaly (mm)

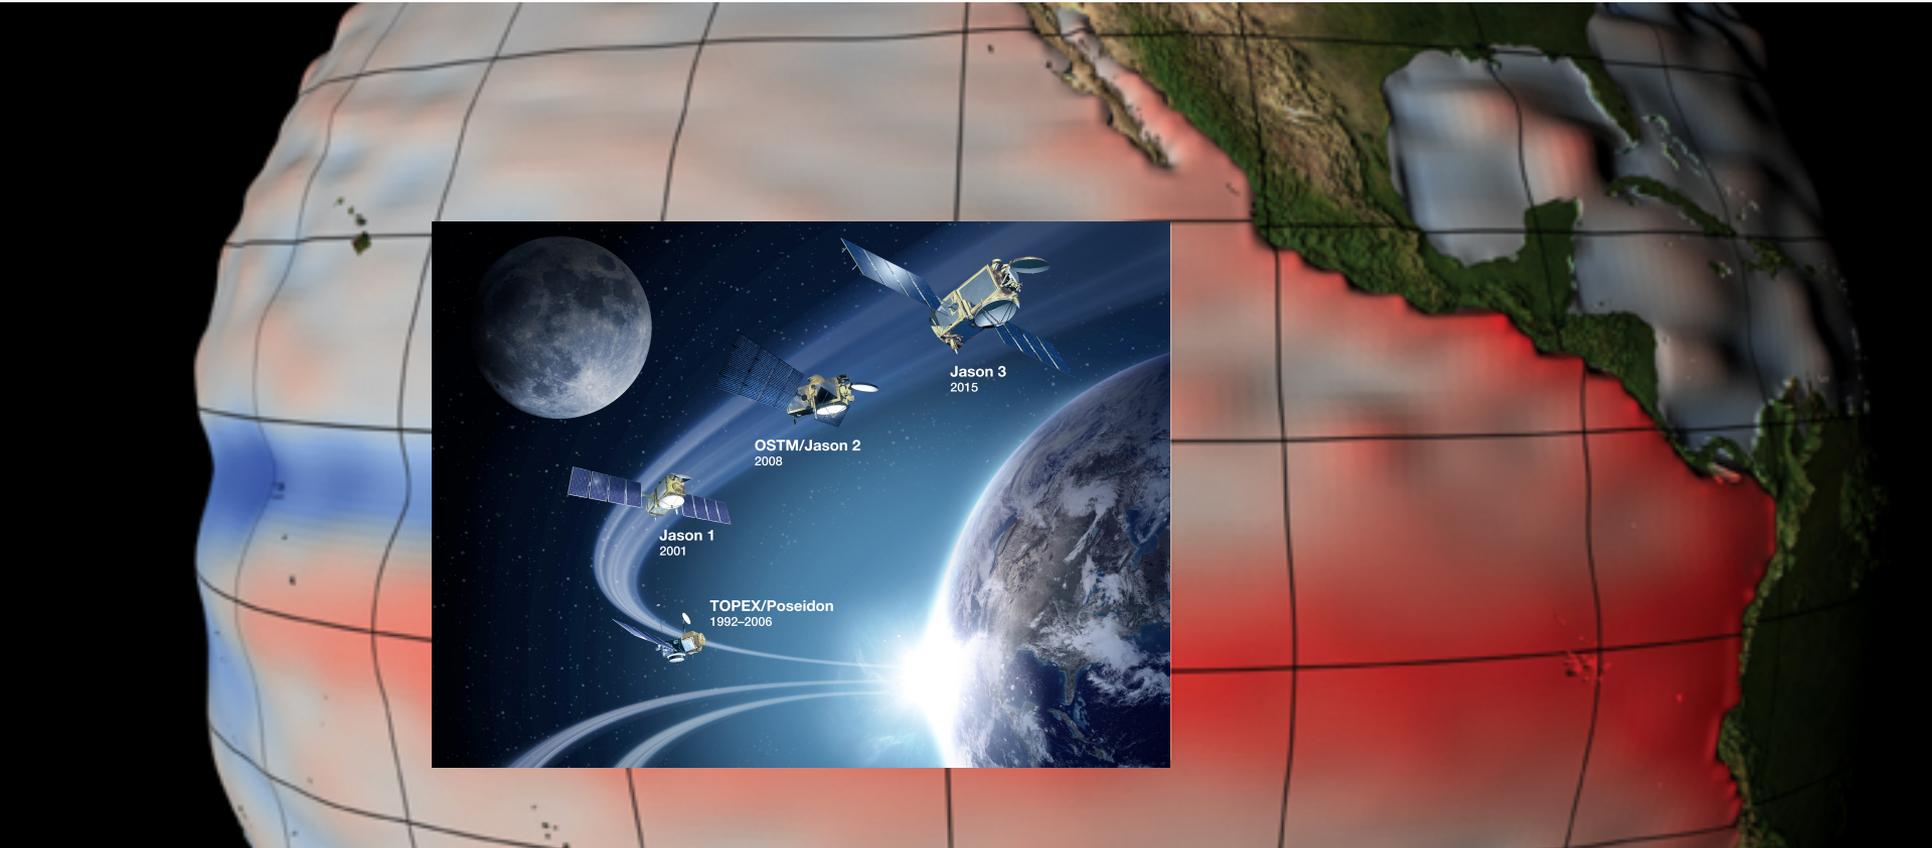

NASA Earth Observatory map, Jason-2.

Jet Propulsion Laboratory
California Institute of Technology

NASA's

Ocean Surface Topography Missions

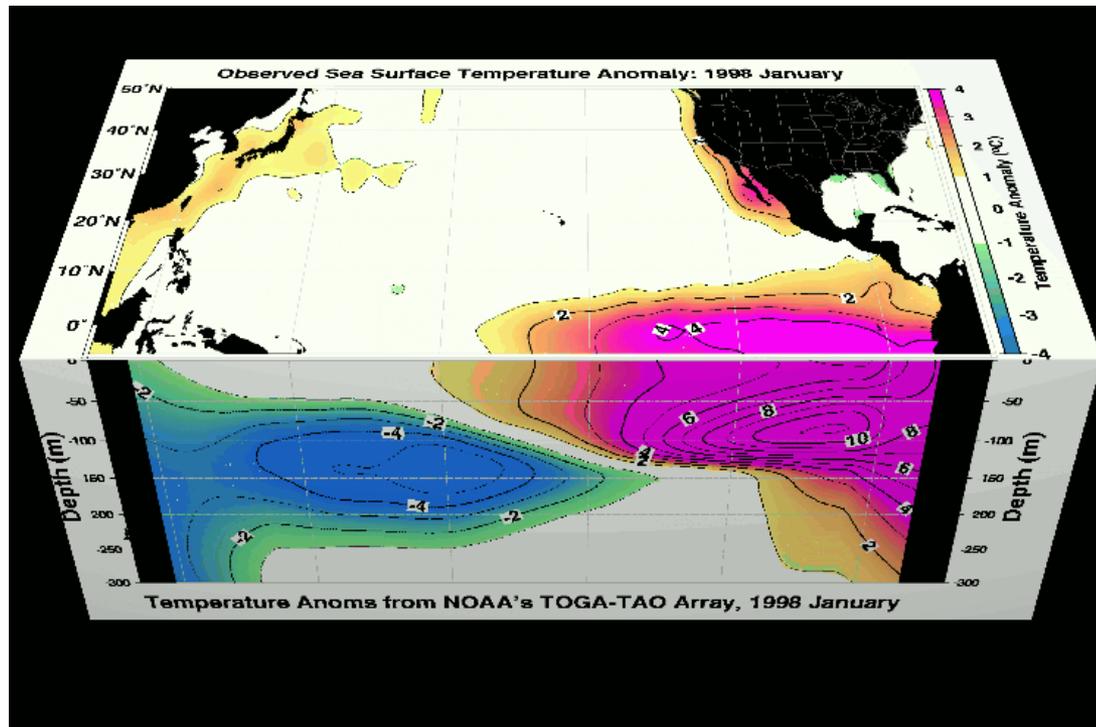

How tall the ocean is? A measure of how much heat is stored in the ocean.

How can we monitor El Niño?

Direct Measurements

Temperature Anomalies from NOAA's TOGA-TAO array.

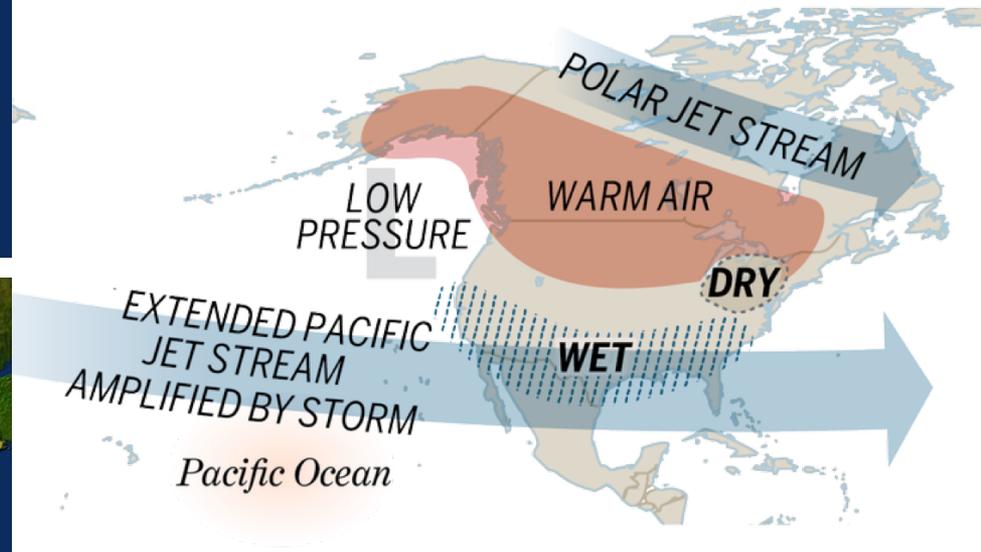

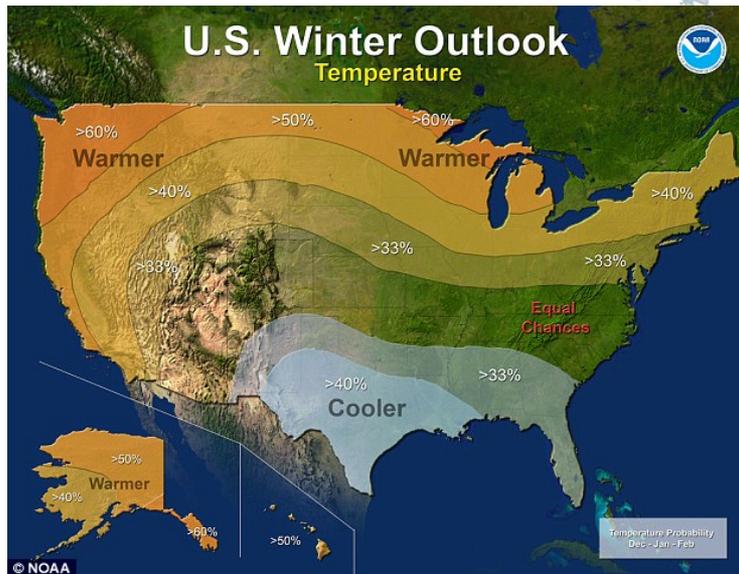

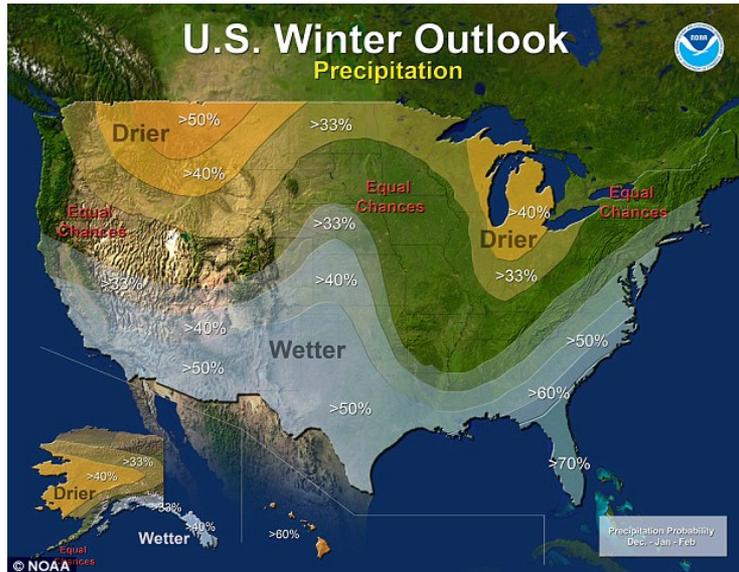

Jet Propulsion Laboratory
California Institute of Technology

**What kind of effects does
El Niño have on the U.S.
and around the world?**

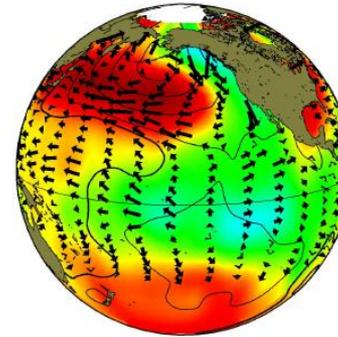

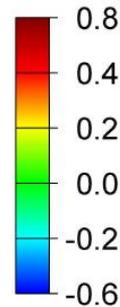

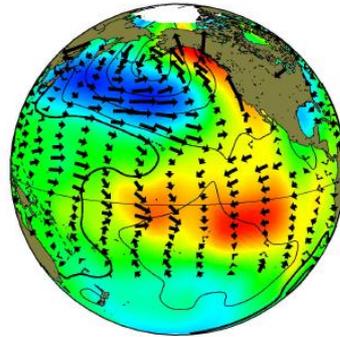

U.S. Weather Patterns Dec-Feb

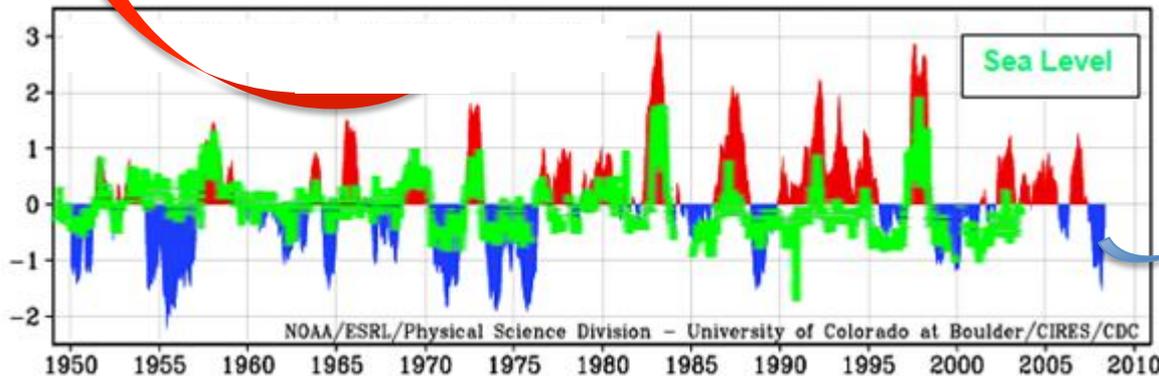

Sea Level Changes: SL Raises in the Eastern Pacific

Warm Pacific:
Sea Level Rises

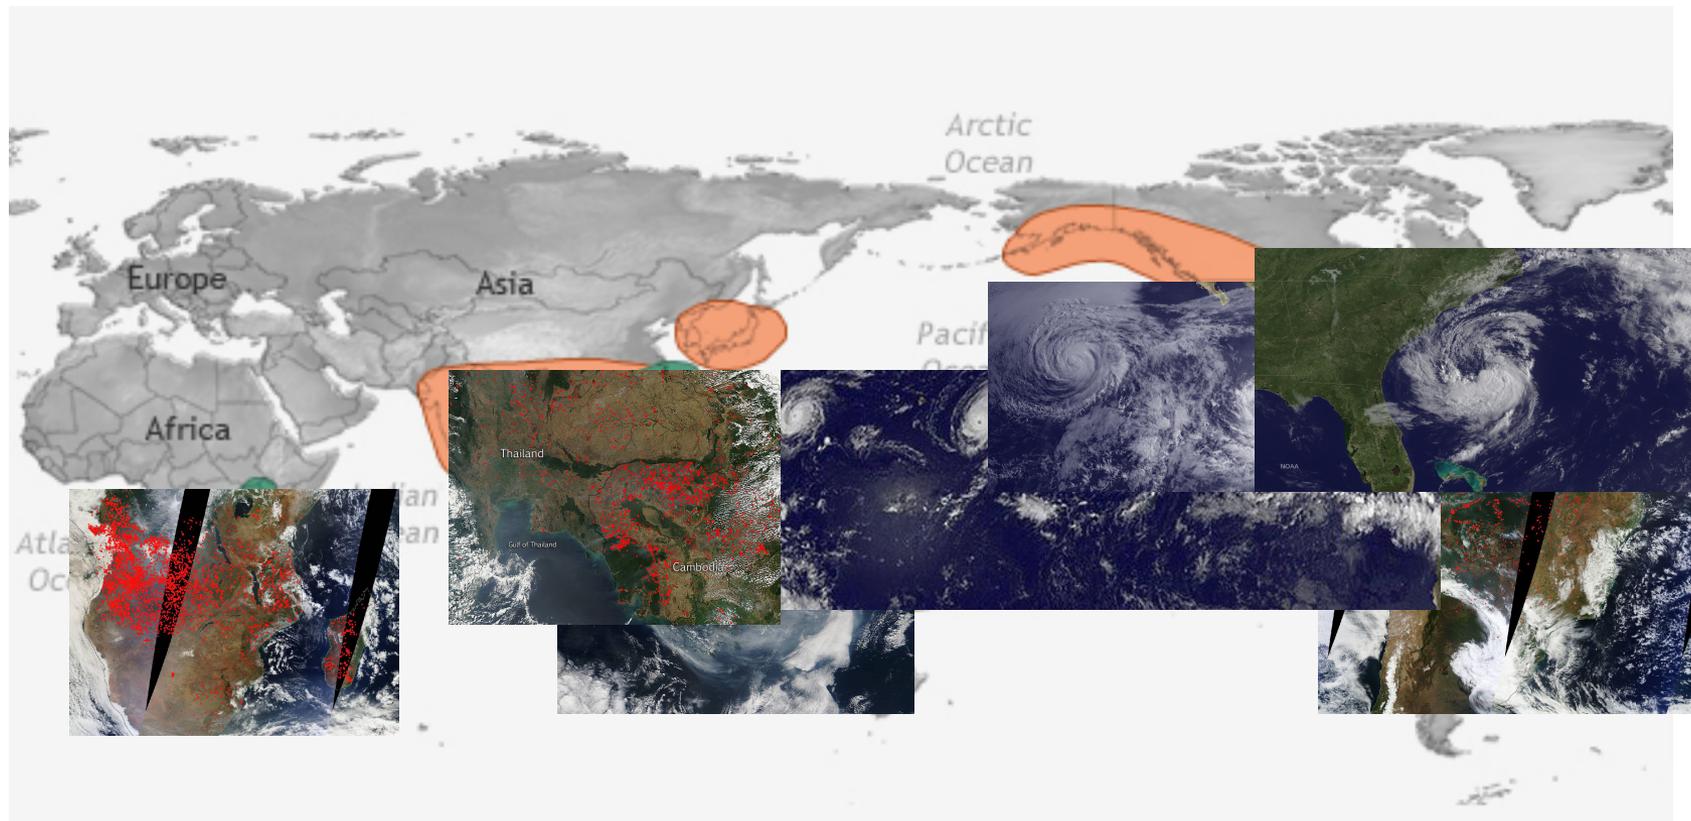

Cool Pacific:
Sea Level Drops

Historical El/La Niñ@ Data

Historical Record

The diagram shows anomalies in the sea surface temperature in the Central Pacific during the three-month period of November, December, January - when the events peak - except for 2015, for which the latest data is from June, July, August.

There is over 60% probability that El Niño will morph into La Niña!

Has El Niño 2015-16 reached its potential?

**MEAN MONTHLY PRECIPITATION FOR NEUTRAL,
LA NINA, & EL NINO EPISODES - DOWNTOWN LOS ANGELES
- 1877-78 THRU 2008-09 SEASONS -**

**Will El Niño bring relief
to the drought in California?**

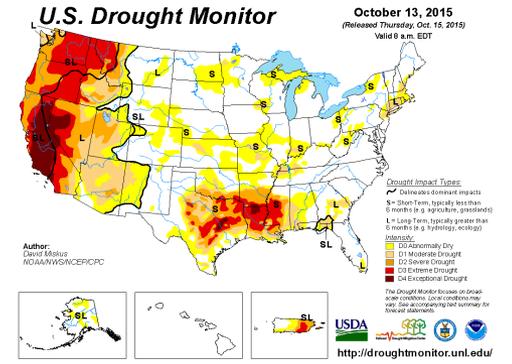

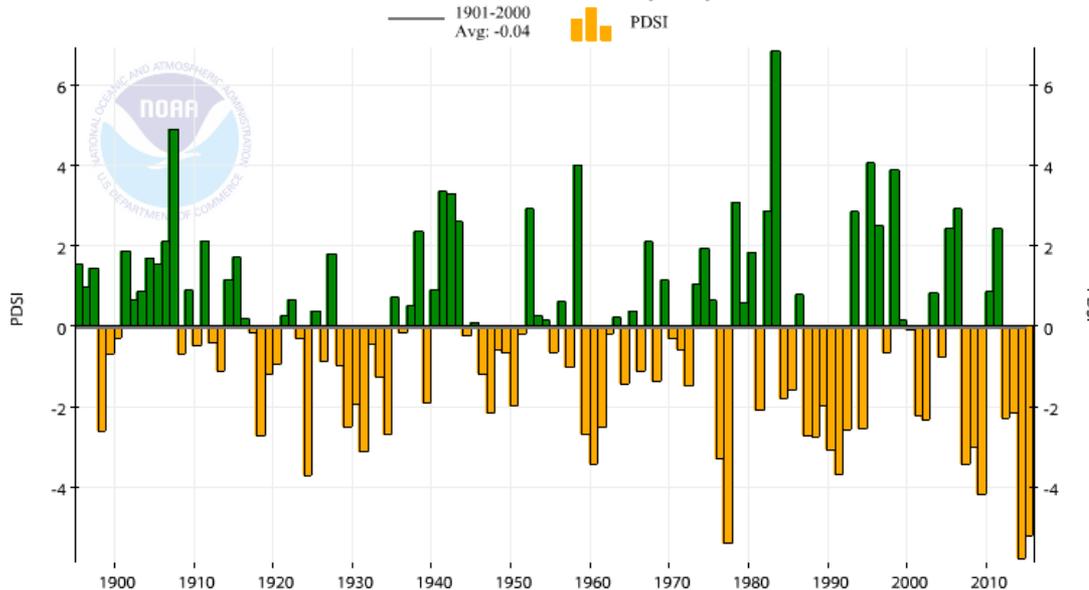

CA drought began 15 years ago

California, Precipitation, January-May

California, PDSI, January-May

Last 4 years: 25% of this drought!

2011-2015 marked the driest four consecutive rainy seasons on record in downtown L.A.

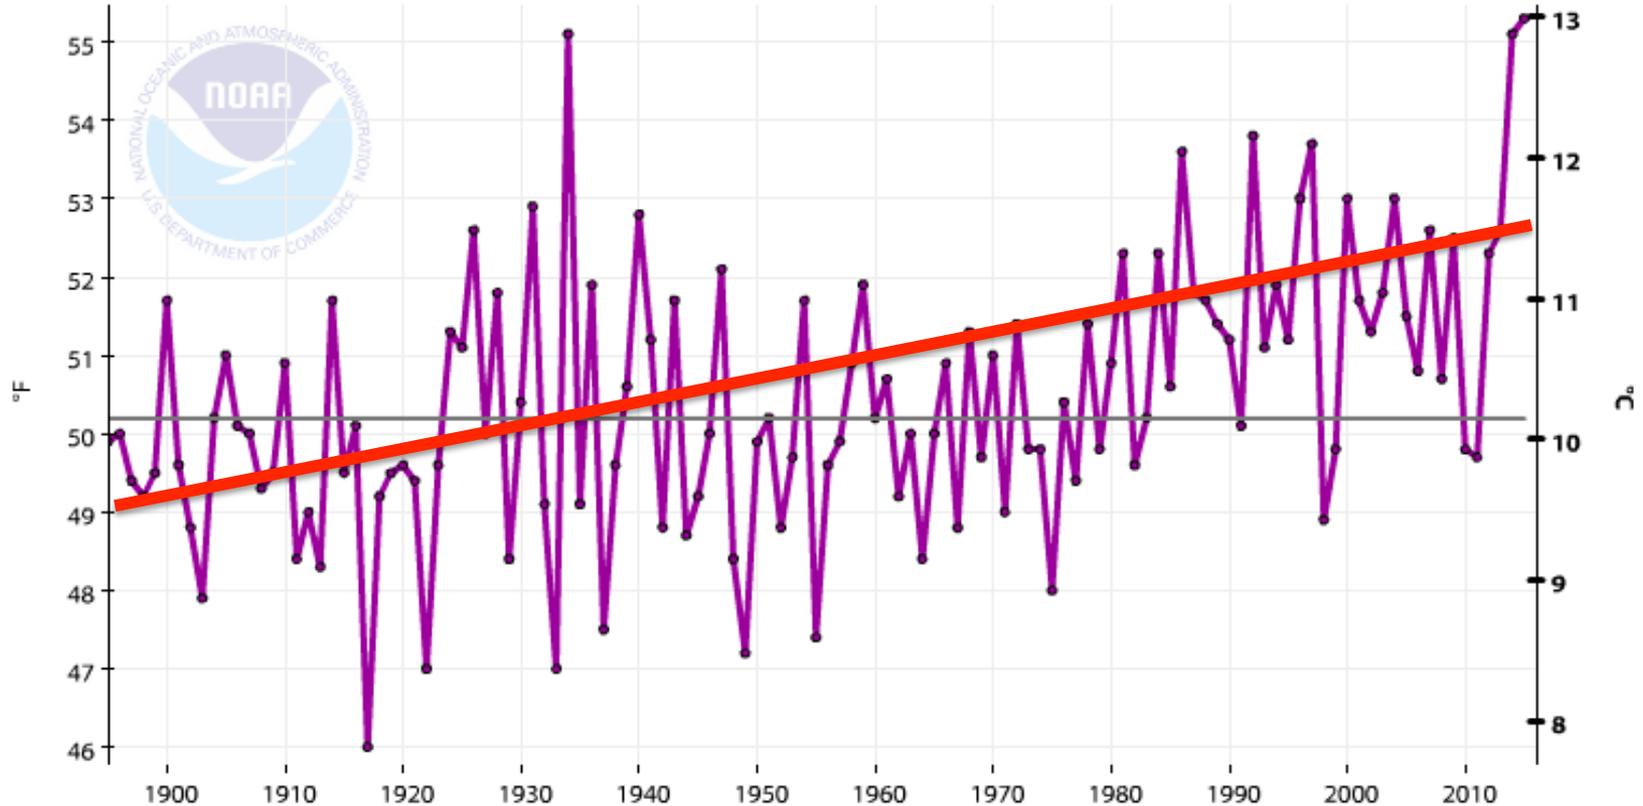

Global Warming Trend: 2.5 °F in 115 years

California, Average Temperature, January-May

— 1901-2000 Avg: 50.2°F —●— Avg Temperature

2015 Hottest Year on Record

Year-to-Date Global Temperature
for 2015 and the six warmest years on record

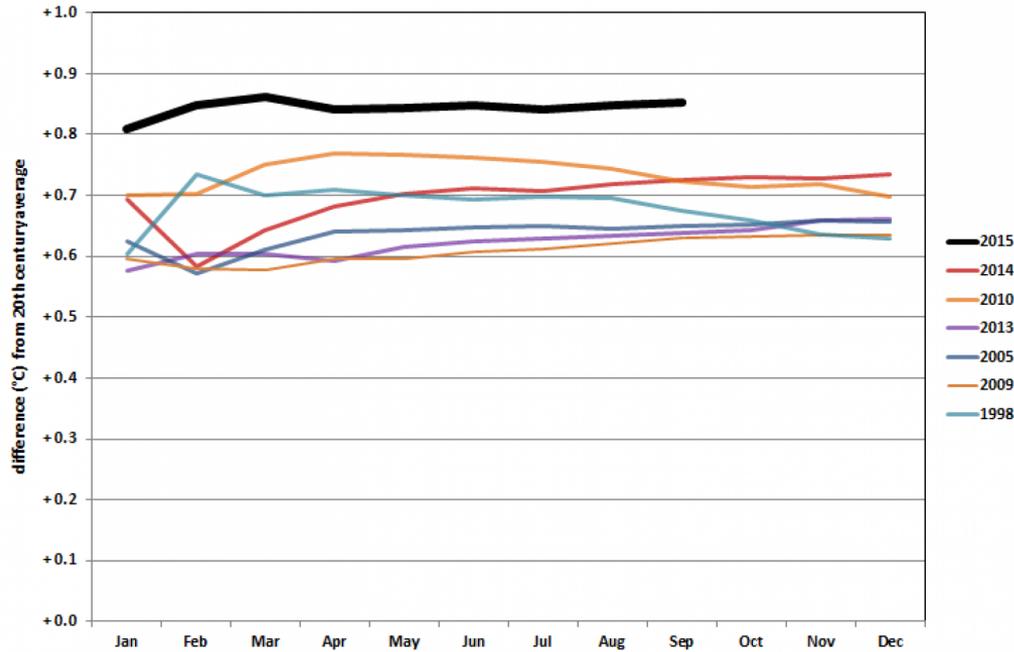

Chart shows global warmth of 2015 is on another level compared to previous warmest years (NOAA).

RANK 1 = WARMEST PERIOD OF RECORD: 1880–2015	MONTH + YEAR	ANOMALY °C	ANOMALY °F
1	September 2015	0.90	1.62
2 (tie)	January 2007	0.89	1.60
2 (tie)	February 2015	0.89	1.60
2 (tie)	March 2015	0.89	1.60
2 (tie)	August 2015	0.89	1.60
6	June 2015	0.87	1.57
7	February 1998	0.86	1.55
8 (tie)	March 2010	0.85	1.53
8 (tie)	May 2015	0.85	1.53
10	December 2014	0.84	1.51

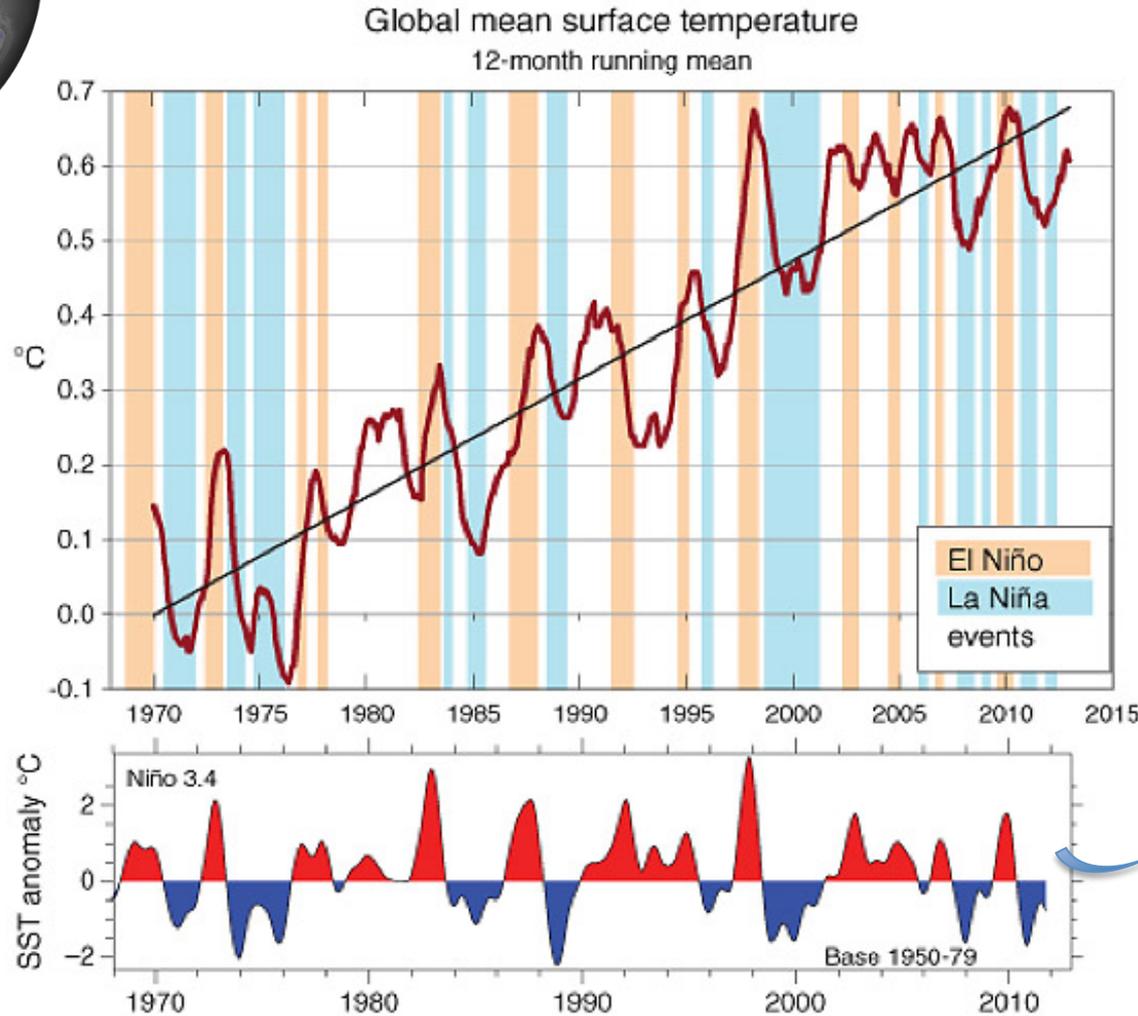

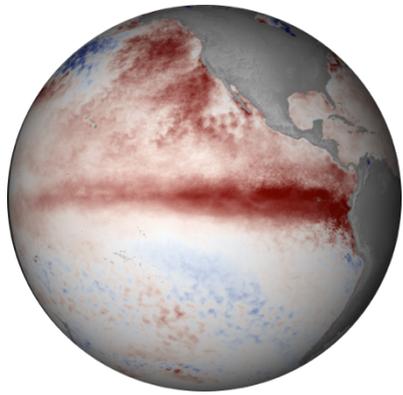

Top 10 monthly temperature departure from average (NOAA).

California Institute of Technology

**To what extent will El Niño
increase warming this year?**

Niños and Global Temperature

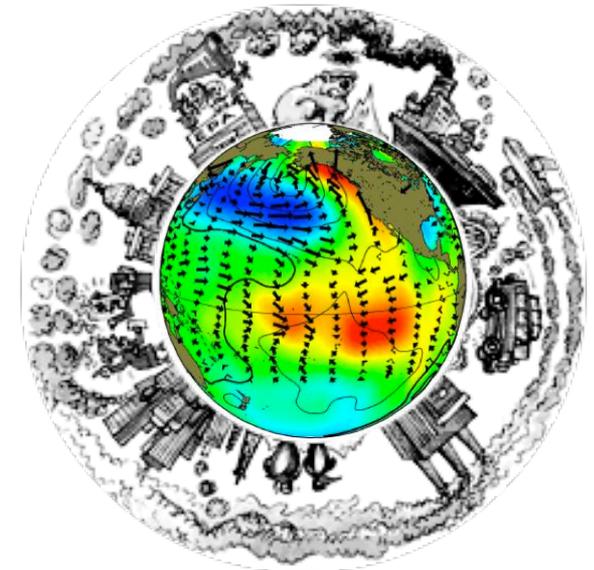

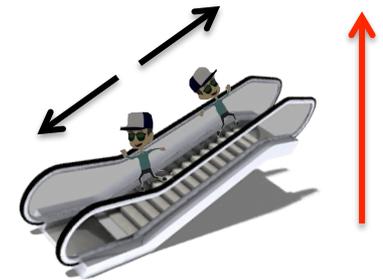

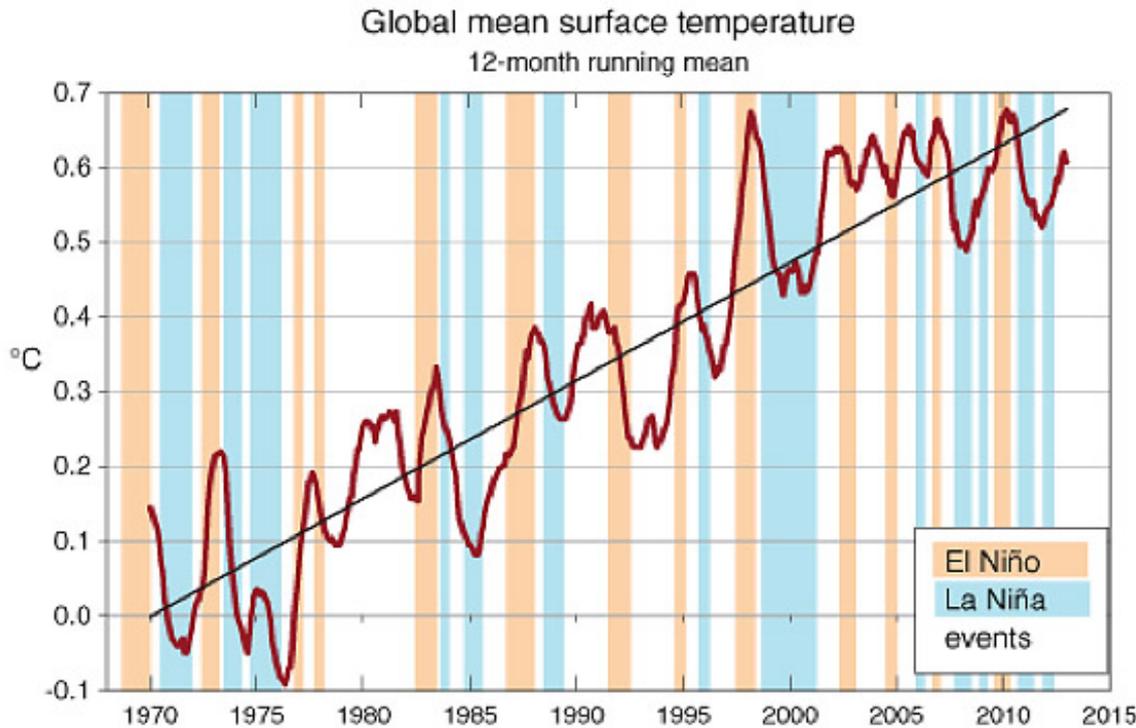

K. E. Trenberth and J. T. Fasullo, *Earth's Future*, 2013.

Two Effects:

Natural Cycles & Human-Caused Warming

EL NIÑO

- Has a large impact on society: weather patterns & sea level changes.
- Plays an important role regulating the Earth's surface temperature .
- Is not a real drought buster: but a decade or more of above normal precipitation.

Jet Propulsion Laboratory
California Institute of Technology
