

# Trees Are Beautiful

## Spring Tree Campaign

**Each spring you can watch trees waking up. Their buds burst open and new leaves start to grow. Learn more about this miraculous change with the GLOBE Spring Tree Campaign.**

Try 5 short activities that will guide you through the spring observations along with news and inspiration from scientist and other GLOBE schools.

**The campaign runs between February and June. To join, please [register](#).**

### During the Spring Campaign you will:

- ✎ Choose your tree - one of the 7 species (Hazel, Fig, Lime, Oak, Cherry, Birch, Beech) that GLOBE students around Europe follow in spring.
- ✎ Select four buds and observe them swell and open.
- ✎ When new leaves start to grow, regularly measure their length.
- ✎ Take pictures with [GrowApp](#) – an app that directly transforms pictures to animation.
- ✎ [Share you pictures and results](#) with other students around Europe.
- ✎ Contribute to the worldwide GLOBE Program database.

### What more can you do?

- ✎ Connect to schools from other countries within the School Collaboration group.
- ✎ Learn about the role of trees in the carbon cycle.
- ✎ Try measuring height of a tree
- ✎ Earn virtual badges for collaboration and data entry.
- ✎ Get inspired by research and activities of other students.
