

Guide – How to upload data on globe.gov

Login to globe.gov with your account

Click on the little arrow next to **Go to** and then select **Enter Data**.

This will take you to the list of your data sites (if you do not see any sites, click on the **+** next to the name of your school organization, the sites will unfold down). As you can see, at my organization, I have already a site called Phenology 2018. This is a site where I have 2 trees.

NOW:

A) If you never uploaded data for your tree in past, you first need to **create a new site**. Continue to next page.

B) If you uploaded data for the same tree in past, you most likely know what to do: you select the site from your list and start **entering data**.

1. How to create a new site

In your Data Entry menu, click on **Add site** on the right from your school name. You will define your site now:

Fill in the **Site Name** and the **Coordinates**. The easy way is to use the map: zoom in and scroll until you find the site where your tree grows. Then move the red dot to that place, you already see that the coordinates got filled automatically. Elevation will be filled automatically as well if you click on Set elevation.

Then you have to choose from the menu on the left **Biosphere – Greening**, which means that this site can be used for recording data on Green Up and Green Down protocol. This will pop up:

Fill in the **Vegetation Type** (tree), **Genus** (write in latin), **Species** (choose name in latin). Then **label** your tree according to how you call your tree. If you observe more than one tree at the same site, then click on green button **Add Plant** and do the same for your second tree.

After you finish this, click on blue button **Create Site**.

You will see green smiley if you are successful:

Data Entry Home / TEREZA Educational Center / Phenology 2018

Site created successfully.

Phenology 2018

Site ID 125791

Coordinates

If something went wrong, you get this one. You have to add missing information (scroll down to find the place) and again confirm it.

Data Entry Home / TEREZA Educational Center / Phenology 2018

Site update failed with 3 error(s).

- Label can't be blank.
- Vegetation type can't be blank.
- Taxon genus and species must both be selected.

Site Name * * indica

The shortest way to data entry page is to click on the **Data Entry Home** in the left upper corner.

You can as well go back to globe.gov and again use that **Go to – Enter Data** shortcut.

2. How to enter data to my site

Once you are back in data entry, click on your phenology (Greening) site. Click on + if you can't see it.

Two options will pop up: New observation or Past Observations. Click on **New Observation**.

The first thing you have to do is to select a date. Pick the earliest date when you started to observe the bud. After selecting the date, more fields will come: Select **Green Up** and fill in **Growing season cycle** (this will be mostly 1 for European region).

After filling this, the fields pop up for you to fill in data for each bud/leaf.

Under the heading Plants you see the name of your tree and four rows, each for one leaf/bud.

Select **Leaf State** from drop down menu for each leaf.

Repeat for all your trees.

Confirm by clicking on the blue button **Send Data**

You will again see green smiley if you are successful.

1

* indicates required sections or fields

To enter data for a **next date**, click on the blue link **Create a new one**. Then you repeat the steps.

To view the data you entered click on **View Observations**. You will see the list of your observations according to dates. Here you can correct the data (click on the date) or delete the record.

THE GLOBE PROGRAM SCIENCE Data Entry Welcome Bára Semeráková
