# Trees around us

# Importance of woody plants in human settlements
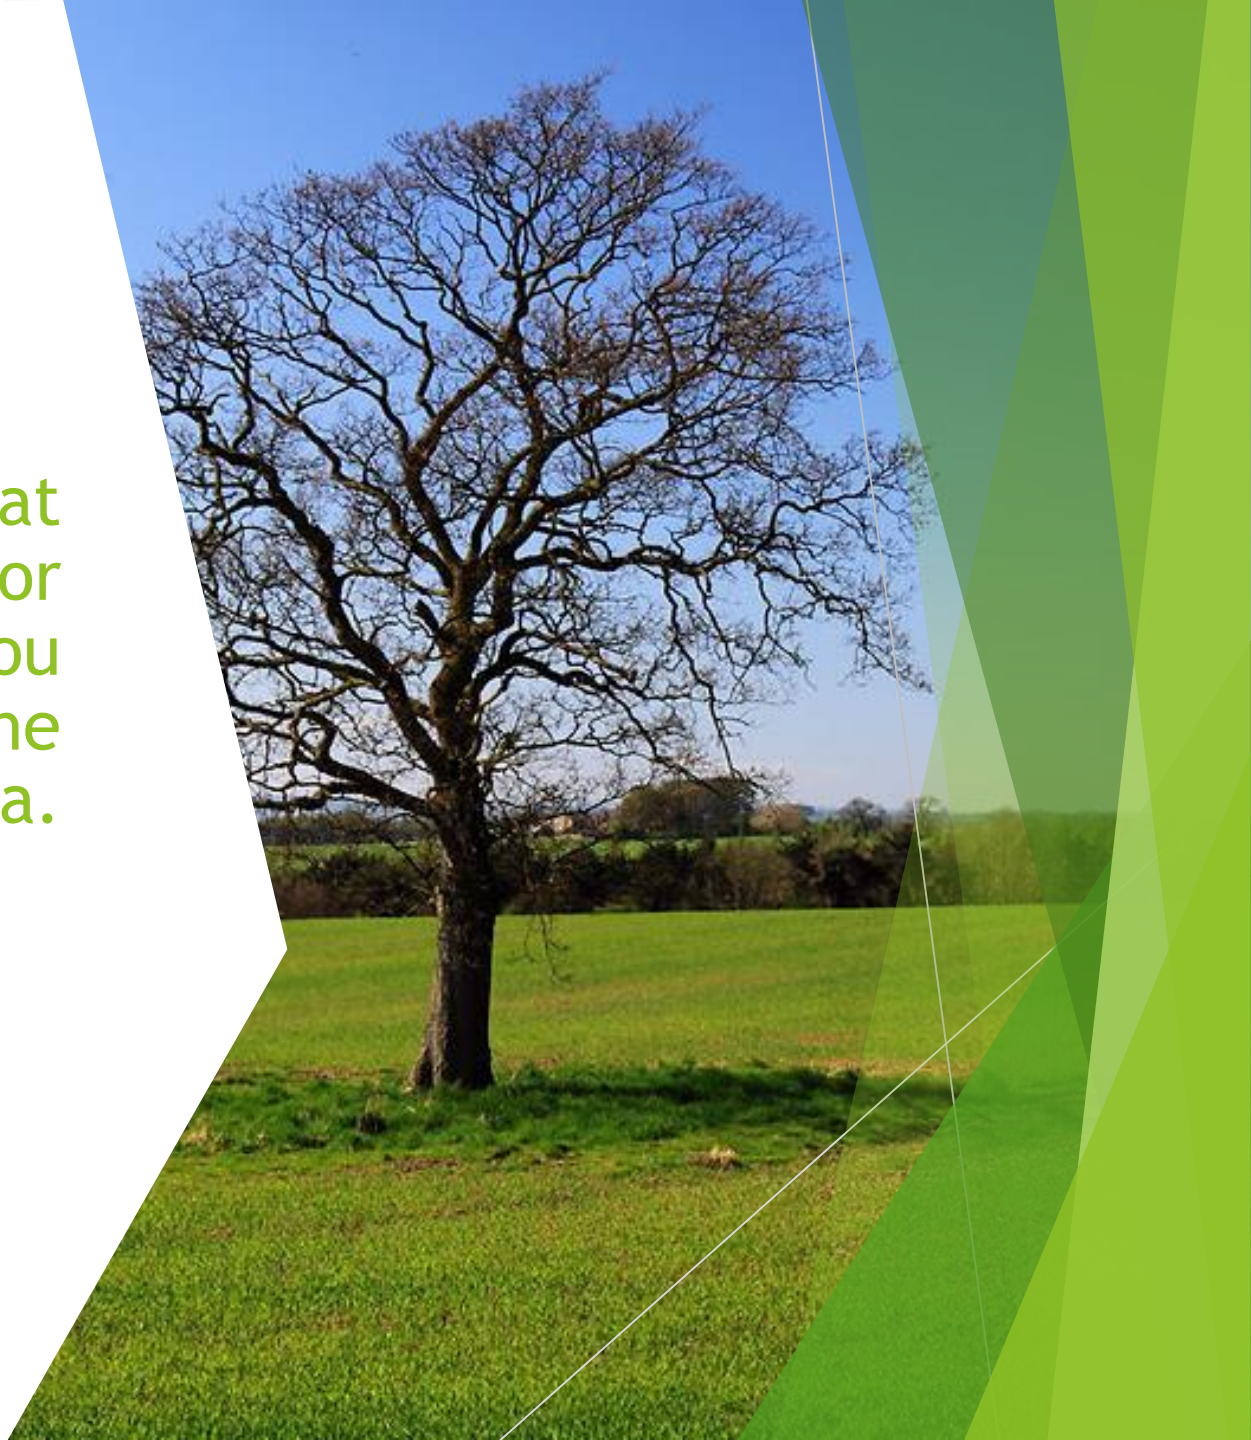

- Aesthetic

- Hygienic

  - Dust fixation, decreassing ground-level ozone.

  - Humidification of air, production of oxygen.

  - Balancing temperature extremes.

  - Noise absorption.

# Problems of trees in cities

▶ Often limited space above and below the ground.

▶ Extreme temperatures and exhalations.

▶ Vandalism, disrespect for the necessities of trees.

Don't ask what trees can do for you. Ask what you can do for the trees in your area.

# Trees in a public space

- Where there are trees in the city, they need to be guarded.

- Environmental protection laws also apply to trees.

## Start participating in the creation of public space

▶ Communication with the village management, cooperation in the implementation of tree planting.

▶ Adoption and care of a piece of public space.

# Project preparation. Where to take trees but not steal.

- ▶ Consultation with an expert.

- ▶ The right choice of trees in the right place.

TRIBUNA

# The right planting technology

# Tree care

- ► Help with water shortages.

- ► Protection against damage.

Guerilla-gardening

# Life after tree life

Leaving dead wood in the landscape will help biodiversity

Dying trees, if they are not dangerous, also have their place in nature.

Thanks for your attention
