

Trees Are Beautiful

Spring Tree Observation Campaign

Each spring you can watch trees waking up. Their buds burst open and new leaves start to grow. Learn more about this miraculous change with the Spring Tree Observation Campaign.

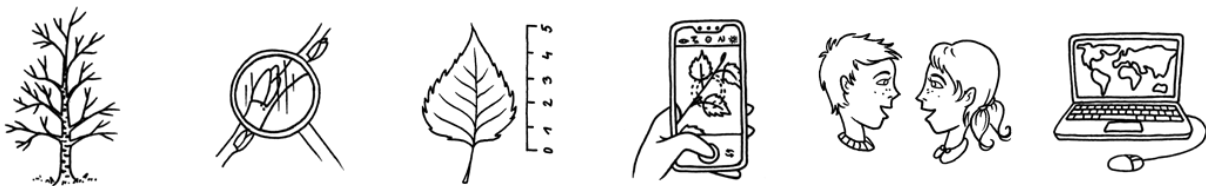

You will receive 5 short activities that will guide you through the Spring observations along with news and inspiration from scientist and other GLOBE schools.

The campaign runs between February and June. To join, please [register](#).

During the Spring Campaign you will:

- 🍃 Choose your tree - one of the 7 species (Hazel, Fig, Lime, Oak, Cherry, Birch, Beech) that GLOBE students around Europe follow in spring.
- 🍃 Select four buds and observe them swell and open.
- 🍃 When new leaves start to grow, measure their length at least twice a week.
- 🍃 Take pictures with [GrowApp](#) – an app that directly transforms pictures to animation.
- 🍃 [Share your pictures and results](#) with other students around Europe.
- 🍃 Contribute to the worldwide GLOBE Program database.

What more can you do?

- 🍃 Connect to schools from other countries within the School Collaboration group.
- 🍃 Learn about the role of trees in the carbon cycle.
- 🍃 Earn virtual badges for collaboration and data entry.
- 🍃 Get inspired by research and activities of other students.
