

Exploring Surface Temperature using a NASA AREN TerraROVER

Join the *AEROKATS and ROVER Education Network* for three virtual sessions in May to learn new ways your students can explore how surface materials impact local temperatures and produce phenomena such as the *Urban Heat Island Effect*. Use **GLOBE** measurement protocols, discover lessons from **My NASA Data**, and learn how to operate and use a **NASA/AREN TerraROVER** to collect and analyze your own surface temperature data.

Teams should apply to participate through this link: <http://tinyurl.com/AREN-TR24>

RESPONSES ARE DUE BY March 22, 2024

A limited number of spaces are available for this opportunity. Teams will be notified by **April 10th**.

Selected participants will receive a TerraROVER for their school and all materials necessary to complete the workshop and related activities.

- Workshop Dates: May 14th - 16th (three sessions ONLINE)
- Workshop Times: 6:00 PM - 8:30 PM ET
- Training materials will be provided (including a TerraROVER)
- Opportunity for ongoing PD with additional resources

The AREN Project is funded through a NASA Science Activation CAN Award
