Grass Green Up Measurements

1. Look for new green grass shoots. Record:
   - ➢ **No Shoot (NS)** if there are no new shoots.
   - ➢ **Lost (L)** if something happens to the shoot and you cannot continue observations.
2. After a shoot appears, mark it with a single dot, mark the second with two dots, the third with three, and the fourth with four.
3. Use a ruler to measure the length of the shoot to the nearest mm and record the length in the table. Measure the leaves until the length stops increasing.

Date (MM – DD)	Leaf 1	Leaf 2	Leaf 3	Leaf 4
